Any other information you would like to provide	<p>I am having 17+ years of experience in the field of social development sector. Having a qualification of Postgraduate in Public Health, I hope that I can serve the organization on the concerned issues. I have good knowledge about participatory approaches, rights based approaches, integrated approaches, Monitoring, Evaluation, Project implementation, Planning, Mobilization, Training and Financial Management. The state of Uttar Pradesh & Madhya Pradesh are confronted with a number of challenges and most daunting concern is the health sector. The health problems of the state are further compounded due difficult geographical terrain; along with the poor accessibility to health facilities and poor availability of health services in existing health infrastructure. Looking back to my previous experiences with WHO-NPSP as Block monitor in Polio eradication and routine Immunization programme, it gives me lots of learning in health related issues, planning, and monitoring and data analysis. After WHO-NPSP I joined IPE-UNICEF(SMNET) as Block mobilization coordinator, it gives me lots of learning on MIS, Grid approach and resource map, Participatory Planning, Monitoring, Financial Management. I have also work experience with SARD supported by OXFAM INDIA as District Coordinator in HIV AND AIDS main streaming programme, it gives me lots of learning in HIV related issue. in this programme we involved with the sensitization of women and child department, judiciary & PRI many more things have to be taken up for improvement in HIV testing health I also try to decrease the Stigma & discrimination of HIV+ people supporting by counter parts and govt. department and also strengthen the liaisoning of link worker partner, TI partner and its delivery to underserved and deprived community of the state. When I was working with PATH as Field Co-ordinator (Saving Children's Lives through Immunization Project) in Dist. Datia (M.P.) I involved with the different health functionaries to plan and implement IEC activities for the routine immunization & provide technical input, Managing and supervising activity of routine immunization, Organized ANM, LHV, Health Supervisor, ASHA & AWW orientation on Immunization also. When I was working with INTRA HEALTH/USAID as Programme Manager "Consultant" (VISTAAR Project) in Dist. Varanasi (U.P.). I involved in Planning & Implementation of various programme activities (VHND, VHSC, ASHA,AWW & ANM/LHV interaction) as per work plans and managed Block coordinators. Support in Liaoning and networking with district and block level stakeholders. Advocacy with district and block level government officials and functionaries. it gave me lots of learning about National Rural Health Mission. When I was working with Micronutrient Initiative India, I Provide technical assistance (ICDS, Health, and Education Department) for strengthening of various programs-(1)</p>

Strengthening Anemia control program for school going adolescent (boys & girls) / out of school adolescent girls / child anemia. (2) Strengthening biannual Vitamin A rounds. (3) NRC operationalization. (4) Promotion of IYCF (5) New WHO Growth Standard roll out (6) Improving usage of iodized salt; in the Districts. Presently I am working in UNICEF supported Home base newborn care Program, Effective Vaccine Management and Labor Room Strengthen Program as Divisional Resource Person in Agra Division Uttar Pradesh. Above these quality show that I am best and suitable candidate for this post. Keeping all this aspect and looking into the broad job responsibilities for the position, think that getting this platform would encourage me to do much better innovations and provide some technical inputs to the partner organizations.
